Portfolio

SHEHAN UYANWATTE

BSc IT Undergraduate

The Open University of Sri Lanka

Summary

Proactive and results-driven student eager to contribute my skills and learn from industry experts. I'm actively seeking opportunities to gain hands-on experience and build professional connections.

Education

- The Open University of Sri Lanka (2023 - Present)
 - Bachelor of Science in IT
- The Open University of Sri Lanka (2021 - 2022)
 - Advanced Certificate in Science
- St. Peter's College - Bambalapitiya (2006 - 2019)
 - O/L - 7A 2C
 - A/L - 2C 1W

Technical Skills

- Machine Learning
 - Linear Regression, Logistic Regression, Reinforcement Learning, Classification
- Specialised AI
 - Neuro Symbolic AI, Knowledge Based Systems, Neuro Symbolic Systems
- LLMs and Gen AI
 - LLMOps, LangChain, Vertex AI, Transformers
- Logic and Search
 - Symbolic AI, BFS, DFS, Prolog, Symbolic Reasoning
- Artificial Neural Networks
 - Deep Learning, Neural Networks, Tensorflow, Numpy, Pytorch
- Mobile and Web Dev
 - React Expo, Node.js, Next.js, NX Mono Repo
- DB and Cloud
 - MySQL, Neo4j, Firestore, Firebase, AuraDB
- Programming Languages
 - Python, JS, Java, HTML, CSS, C
- UI and UX Design
 - Figma, UX Design, UI Design, Canva, Design Thinking
- Productivity
 - Problem Solving, Teamwork, Communication, Time Management

Certifications

- [Machine Learning Specialization - DeepLearning.AI / Stanford University](#)
- [Supervised Machine Learning - DeepLearning.AI / Stanford University](#)
- [Advanced Learning Algorithms - DeepLearning.AI / Stanford University](#)
- [Unsupervised Machine Learning - DeepLearning.AI / Stanford University](#)
- [Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate](#)

Work Experiences

- **AMW Capital Leasing and Finance PLC - IT Intern (2026 Feb - Present)**
 - As an IT Intern at AMW Capital Leasing and Finance PLC, I provide hands-on IT support, system maintenance, and troubleshooting while contributing to key departmental projects and initiatives.
- **AV Business Solutions Pvt Ltd - Quality Control Supervisor (2024 Aug - 2024 Dec)**
 - Led a team of four and streamlined onboarding to maintain high service standards. I ensured compliance by reporting protocol violations and provided weekly KPI analysis to support executive decision-making.
- **AV Business Solutions Pvt Ltd - Quality Control Specialist (2023 May - 2024 July)**
 - Audited customer interactions to ensure professional standards and compliance. I identified performance gaps and recommended data-driven training and process improvements.
- **AV Business Solutions Pvt Ltd - Data Entry Operator (2022 Nov - 2023 May)**
 - Led high-precision payment processing and company-wide email communications, resolving complex inquiries to maintain top customer satisfaction ratings.
- **Commercial Bank - Nugegoda - Data Entry Operator (2021 Apr - 2022 Oct)**
 - Maintained 100% data integrity across multiple banking systems while coordinating high-volume data entry and documentation tasks under tight deadlines.

Projects

- **Apparel Marketplace App | React Native (Expo), TypeScript, Firebase, Python, Neo4j, LangChain**
 - Led product strategy and design by authoring a comprehensive business case and creating high-fidelity Figma prototypes to map complex stakeholder requirements.
 - Architected and secured a dual-role React Native marketplace using TypeScript and Firebase, incorporating real-time inventory management and biometric authentication.
- **Neuro Symbolic Math Solver**
 - Developed a Neuro-Symbolic AI Math Solver using Python, integrating a Llama 3.2:1B model for natural language processing with Sympy for symbolic computation.
- **Mock ATM System | Java**
 - Built a Mock banking application featuring secure user authentication and core transaction modules, including deposits, withdrawals, and real-time balance inquiries.
- **Medical Expert System | PROLOG**
 - Developed a diagnostic engine that uses a logic-based knowledge base to identify medical conditions by analyzing user-provided symptoms.
- **GPS Navigation System | PROLOG**
 - Developed a cost-based pathfinding system that calculates optimal travel routes by evaluating variables such as distance, traffic, weather, and vehicle type.
- **SlangGPT**
 - Built a custom decoder-only Transformer from scratch in PyTorch, utilizing a tiktoken subword tokenizer and temperature scaling to accurately translate standard language into Gen Z slang.
- **Astral:V1.0:123M**
 - Built an AI web application powered by a custom-built, 123M-parameter autoregressive Transformer model trained from scratch using PyTorch and FastAPI to generate children's-stories.
- **Flux:V1.0:WebRAG**
 - Developed a fully local, RAG platform that empowers 1B-parameter LLMs with real-time web search capabilities on consumer hardware using few-shot prompting and lightweight Python scrapers.
